

OM SINGH

SENIOR SOFTWARE ENGINEER | BENGALURU, INDIA
Email: omsingh6903@gmail.com Phone: +91 6388639626 LinkedIn: [om-singh-5092](#) Github: [OmSingh5092](#)

SKILLSET

Programming Languages: Java, Golang, Javascript.
Technologies & Tools: Dropwizard, gRPC, REST, Terraform, React, Node.js, Containers, Kubernetes, Hypervisors, KVM/QEMU.
Databases: PostgreSQL, Oracle Autonomous DB, MongoDB, etc, Berkley DB

EXPERIENCE

IC3 SOFTWARE ENGINEER II • MICROSOFT AZURE FEB 2026 • PRESENT • BENGALURU

Azure Edge Hybrid cloud platforms enabling enterprise workloads with high availability and on-prem cloud capabilities.

- Architected and developed a simulated storage appliance solution that reduced infrastructure resource costs by **80%**, significantly improving development and testing efficiency for hybrid cloud platform workloads.

IC3 SENIOR MEMBER OF TECHNICAL STAFF • ORACLE CLOUD SEPT 2025 • FEB 2026 • BENGALURU

Container Instances Oracle Cloud's compute service for containers on scalable and cost effective serverless infrastructure.

- Engineered and tuned distributed workload placement algorithms in Java to achieve a **30% reduction** in container instance creation latency, significantly enhancing throughput under bursty traffic patterns.
- Architected and integrated a centralized audit-logging service for privileged kernel actions across **500+ bare-metal hosts** in **100+ availability domains**, enabling traceability and compliance.

IC2 MEMBER OF TECHNICAL STAFF • ORACLE CLOUD JULY 2022 • SEPT 2025 • BENGALURU

- Designed and implemented control-plane services in Java to automate large-scale customer workload migrations across **100+ global datacenters**, achieving workload transitions with a 10-minute p99 downtime per workload.
- Delivered critical Kubernetes-compatible features to help the platform meet over 70% of customer's requirements, including container metrics collection (CPU & Memory) integrated with OCI Monitoring for Kubernetes HPA and custom auto-scalers, and support for termination grace periods to align workload behavior with Kubernetes pod semantics.
- Led ARM hypervisor enablement by implementing Java services for auto-scaling and bin-packing ARM Bare-Metal capacity, enabling AAarch64 container support in **40+ regions**.
- Identified scope of automation in resolving resource state anomalies. Designed anomaly resolution workflows in Java, single handedly coded, tested and deployed the workflows resulting in an **80% reduction** of incident for such issues.
- Facilitated onboarding of next-gen x86 Bare-Metal instances by contributing to multiple service components including the Java Control Plane and API Gateway; performed benchmark testing to validate a **33% per-core performance** uplift for containerized workloads, driving adoption across supported regions.
- Implemented infrastructure-as-code using Terraform and OCI APIs to manage auto-scaling instance pools and multi-architecture clusters, achieving **40% cost reduction per CPU**.
- Built an internal dashboard in React for real-time visibility and control of service state, enhancing operational efficiency for 50+ on-call engineers and significantly reducing incident response times.

INTERNSHIPS

SOFTWARE ENGINEER INTERN • ORACLE CLOUD MAY 2021 • JULY 2021 • REMOTE

OCI Service Mesh Oracle's Service Mesh solution, simplifying development of cloud native applications.

- Developed a microservices based demo application similar to Istio's BookInfo Application, exhibiting key features of OCI service mesh, used by 100+ developers onboarding to the service.
- Built Cloud-Console UI using internal React toolchains, serving 1000+ customers managing Service Mesh resources.

EDUCATION

BACHELOR OF TECHNOLOGY • NIT ALLAHABAD JULY 2018 • MAY 2022 • ALLAHABAD
Electronics and Communication Engineering; CGPA: 9.25

ACCOMPLISHMENTS

- Published a **research paper** for Indian Academy of Sciences on Dielectric Resonator Antenna Optimization using ML.
- Earned Oracle Cloud Infrastructure **Gen-AI Professional & AI Foundations Associate** Certification.

LEADERSHIP

- Android Development Lead | Coding Club:** Managed and judged hackathons and technical events, and conducted lectures to mentor juniors on Android development and guiding them through real-world projects
- Core Member | Music Committee:** Organized cultural events, judged performances, and mentored juniors, contributing to the club's success and growth.
